

# Workplace Safety & Health Practices Implementation in Environmental Services (Level - 1)

## COURSE OVERVIEW

This course provides foundational knowledge and skills for individuals looking to ensure a safe and healthy work environment. It focuses on the basics of workplace safety and the initial steps needed to implement health and safety practices effectively. Participants will learn how to identify risks, create safety policies, and apply basic safety measures to reduce workplace hazards and accidents.

## COURSE CONTENT

1. Provides an overview of workplace safety and health, covering personal hygiene, common workplace signage for hazard warnings, adherence to organizational control measures such as personal protective equipment, and reporting procedures to supervisors.
2. Equips learners with skills to identify and report hazards, unsafe conditions, and workplace risks. They will learn to use personal protective equipment and safety devices associated with workplace equipment and machinery, and understand the importance of emergency preparedness and workplace training.
3. 3. Focuses on different types of workplace emergencies and the use of emergency equipment. Learners will follow instructions from authorized personnel during both real and simulated emergency situations, and comply with infectious disease outbreak protocols as required by regulatory bodies.
