

BCA Green Mark Scheme

- *The BCA Green Mark Scheme is based on the construction industry towards more environment-friendly buildings.*
- *It promotes sustainability in the built environment and raises environmental awareness among developers, designers, and builders when they start project plan and design, as well as during construction.*

Applications and Assessment

- *Developers, building owners, and government agencies must submit an application form to BCA to register their interest in participating in the BCA Green Mark Scheme.*
- *BCA assessment team will have an initial meeting with the project team or building a management team to brief on the basic and request for relevant reports and documentary proofs to verify submissions.*

Benefits of BCA

- *Facilitate reduction in energy, water, and material resource usage*
- *Reduce the environmental impact*
- *Improve the indoor environmental quality for better health and*
- *Provide a clearer direction for continual improvement.*
