

DYNAMIC SAFETY
PTE LTD

Fire Safety

- *Fire safety refers to planning and infrastructure design for reducing the risk of fire.*
- *Fire safety rules and regulations are designed to save lives and protect people and property. Fire destroys property, cause injuries, and take lives.*
- *As the owner of a business, organization you are responsible for the fire safety of all people on the building.*

Conducting a Fire Safety Risk Assessment

The fire safety risk assessment helps to identify the workplace needs to prevent a fire and keep people safe. The assessments are:

- *Emergency exits*
- *Fire detection and warning system*
- *Firefighting equipment*
- *Removal or safe storage of dangerous substances*
- *Staff fire safety training.*

Why do we need fire safety training?

Fire safety training is important because it gives your employees the valuable knowledge and skills they need to prevent fires and get out of burning buildings.

Benefits of Fire safety

- *Protect employees and customers*
- *Give people peace of mind*
- *Improve employee skills*
- *Improve the fire risk assessment.*
