

ISO 27001:2013 INFORMATION SECURITY MANAGEMENT SYSTEM (ISMS)

ISO 27001:2013 provides a set of standardized requirements for an Information Security Management System (ISMS).

An Information Security Management System (ISMS) is a systematic approach to managing sensitive company information so that it remains secure. It includes people, processes and IT systems by applying a risk management process.

The Six-Part of Planning Process

- *Define a security policy.*
- *Define the scope of the ISMS.*
- *Conduct a risk assessment.*
- *Manage identified risks.*
- *Select-control objectives and controls to be implemented.*
- *Prepare a statement of applicability.*

Benefits

- *Increased reliability and security of systems and information.*
- *Improved customer and business partner confidence.*
- *Increased business resilience.*
- *Alignment with customer requirements.*
- *Improved management processes and integration with corporate risk strategies.*
