

OHSAS 18001 / SS506

OHSAS is an Occupational Health and Safety Management System that is designed for company to better safety and health issues in the organization by reduce the potential for accidents; aid legislative compliance; and improve overall performance.

Upon achieving OHSAS 18001:2007, your organization can apply for bizSAFE STAR via Direct Entry without having to go through bizSAFE Levels 1 to 4.

Why it is needed?

- *To prevent low morale owing to high accident rates*
- *To sustain company business & profit*
- *To organize and self-regulate OHS efforts with legal compliance*
- *To eliminate / minimize / confine risks exposure of employees and other interested parties*
- *To implement, maintain & continually improve your OHSMS and OHS performance*
- *To assure and demonstrate to others – conformance to own OHS Policy*
- *To project company image & to market-differentiate – with sales expansion and manpower stability*

Benefits of OHSAS 18001

- *Improves productivity through reduction of workplace accidents*
- *Prevents downtime or costs related to accidents*
- *Helps to eliminate or minimize risks for stakeholders through identification of hazards and control measures to manage them*
- *Credibility and image improved amongst stakeholders, customers and the public*
- *Legislative compliance and awareness – With OHSAS / SS, system ensures you are compliant with latest laws and legislations*
