

SS577:2012

Water Efficiency Management System

The purpose of SS577:2012 standard is to enable organizations to assess and account for their water usage, and to identify, plan and implement measures to achieve water savings through systematic management of water.

Why it is needed?

- The standard aims to provide a set of frameworks and guidelines, as well as suggested tools and best practices, for water users to adopt to make improvements to their water usage and efficiency.*
- The requirements of water usage, monitoring, measurement, documentation and reporting, design and procurement practices for equipment, systems, processes, and personnel that contribute to water efficiency are spelled out.*
- Companies that are certified SS 577 recognize the impact and savings of water usage, show responsibility in water usage accountability and also demonstrate their commitment to continually enhance their water usage and efficiency.*

Benefits of ss577

- *Adopt a systematic approach to manage water efficiency.*
- *Achieve water savings and reduce operational costs.*
- *Assist in development & reporting of Water Efficiency Management Plan (WEMP).*
- *Opportunity to gain PUB's Water Efficiency Building (WEB) Gold certification.*
- *Increase stakeholder assurance on water issues.*
- *Enhance image as a green sustainability corporate organization.*

How Dynamic Safety can help you?

We are committed to assisting our valued clients in meeting their Quality, Environmental, Health and Safety objectives. We will assist you with the design and development of the certification stage.
