SS 586 Hazard Communication for Hazardous Chemicals and Dangerous Goods

The Hazard Communication Standards (HCS), or HAZCOM for made to make it for people to get information about specific chemicals.

Companies that use dangerous chemicals need to make sure that the HAZCOM standards are followed by employees, contractors, and everyone working in the area.

HAZCOM training in the workplace is important to protect workers from chemical hazards.

Hazard communication training should cover

- *Hazardous chemicals in the workplace and their hazards.*
- *Control or preventive measures and safe work procedures to reduce the hazards.*
- *Procedures to follow if they are exposed to the hazards.*
- *Emergency reaction procedures.*
- *Reading and interpreting labels and Safety Data Sheet.*

Hazardous Chemicals & Dangerous Goods Risks

- *Fire and smoke related injuries*
- *Explosion related injuries*
- *Skin exposure: symptoms include skin dryness, blistering, redness, rashes, and itching.*
- *Eye exposure: the most common symptoms of eye exposure are burning, itching, and watering of the eyes.*
- *Respiratory tract exposure: symptoms may include headache, nose and throat irritation, dizziness, and disorientation.*
- *Chronic disease*
